

September 18, 2007

President George W. Bush
The White House
Washington, DC 20500

Dear Mr. President:

As representatives of nonpartisan organizations committed to improving health care for all children, we are writing to urge your support for the bipartisan legislation to reauthorize the State Children's Health Insurance Program (SCHIP) that is currently being negotiated on Capitol Hill. Since 1997, SCHIP has been a vital program for low-income children in working families whose parents earn too much to qualify for Medicaid but too little to purchase private health insurance. With only weeks to go before the program expires, we urge you to work with Congress and to approve the final agreement that is sent to your desk. Literally, millions of uninsured children are relying on you to sign SCHIP reauthorization into law so that they are able to keep their health coverage.

As you know, SCHIP has strong bipartisan roots – it was enacted by a Republican-led Congress and signed into law by a Democratic President – and that tradition of bipartisanship continues today. The legislation approved in both the House and the Senate has strong support from Senators, Representatives, Governors and Mayors on both sides of the aisle and from an overwhelming majority of the public, who, in poll after poll, strongly support SCHIP reauthorization.

We understand that there are a broad range of perspectives on how best to assure that our nation's children are able to get the health care and coverage they need. However, by all measures, SCHIP has been extremely successful in reducing the number of uninsured children in America. Since 1997, SCHIP has helped to reduce the number of uninsured children by one-third. Nevertheless, there are still 9 million uninsured children in our nation and a shocking 6 million of those uninsured kids are already eligible under current law for SCHIP or Medicaid.

While the bills passed by the House and Senate have differences, both pieces of legislation achieve the mutual goals of Congress, the Governors, and your Administration – targeting resources where they are most needed and ensuring that the children of low-income working parents – most of whom are hourly wage earners who are not offered employer-sponsored health coverage – do not slip through the cracks. As passed, both bills would make major strides in reducing the numbers of uninsured children by providing coverage to well over three million children, most of whom are currently eligible but unenrolled in SCHIP or Medicaid. We expect that any agreement reached by conferees would similarly improve coverage for these vulnerable children.

In an effort to address some of the concerns voiced by lawmakers throughout the floor debate, it is important to note that neither of the bills approved in the House or the Senate raises the poverty level at which children can become eligible for SCHIP. And, the vast majority of children in SCHIP receive coverage through private sector health plans, just as senior citizens do in Medicare Advantage and Medicare prescription drug plans, which your Administration wholeheartedly supports, and just as you receive through the Federal Employees Health Benefits Program (FEHBP).

We appreciate your previous support for and recognition of the importance of improving SCHIP enrollment. We were heartened by the campaign pledge you made at the Republican National Convention in 2004: "America's children must also have a healthy start in life. In a new term, we will lead an aggressive effort to enroll millions of poor children who are eligible but not signed up for the government's health insurance programs. We will not allow a lack of attention, or information, to stand between these children and the health care they need." At this critical time, and with the interests of the children in mind, we urge you keep your campaign promise to make progress toward reducing the number of children who are eligible for coverage but not currently enrolled in SCHIP or Medicaid.

Public opinion is nearly unanimous that no child in America should go without medical care because they lack access to coverage. A recent national poll commissioned by First Focus and performed by GOP strategist and pollster Frank Luntz, found that 90 percent of Americans believe that every child in America has a right to basic healthcare, with 83 percent of Americans who support renewing SCHIP before the legislation expires in September. In addition, by a ratio of 66 -17 percent, American voters say they are less likely to reelect their Senator or Congressman in the next election if they fail to support legislation aimed specifically at reducing the number of uninsured children in America.

We know you agree that our children are our nation's most precious resource and that investments in health care for kids reap benefits that last a lifetime. We urge you to stand with our children and to put their interests ahead of the partisan rhetoric that is threatening a timely SCHIP reauthorization. We welcome the opportunity to discuss these issues with you and to work with you on this and other initiatives to be sure that all of our nation's children have access to the health care services and coverage they need.

Sincerely,

First Focus
